

# Declaration of release of our email address (domain) with your hotmail account

---

Unfortunately we can't guarantee that you will receive our emails even if proceeding with the following steps ☹ as „hotmail“ (Microsoft) is likely to block entire domains (Internet-IP-sequences)

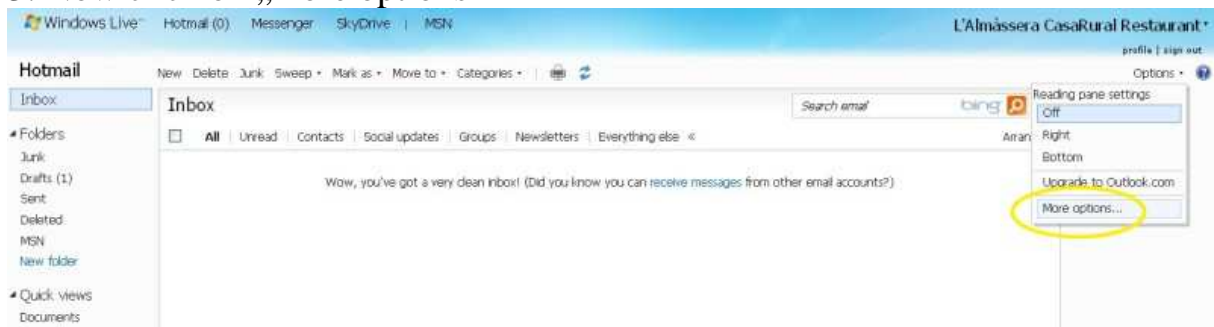

P.S.: There are many cost free email providers, maybe it's time to try another one, as your personal liberty should be prior to third parties business policies ;-)

---

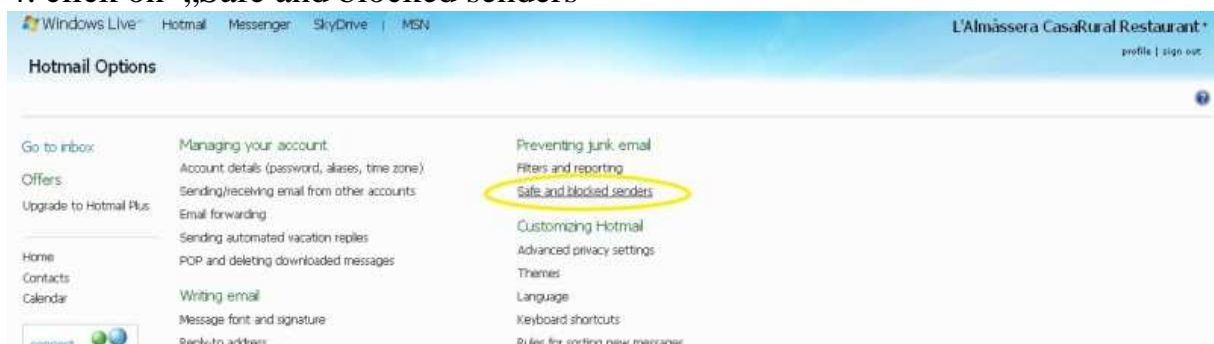

1. Sign in at your hotmail account
2. click right on the top at „Options“

3. Now click on „more options“

4. click on „Safe and blocked senders“

## 5. Now click on „safe senders“

## 6. Please do now put in our domain „@almasera.eu“ as on the picture and click on „add to list“

You should now (as shown) find our domain under secure.

## 7. Go back to „safe senders and blocked senders and click on „blocked senders“

8. If our domain „@almasera.eu“ is not found on the right under „blocked domains“ everything is all right, if it’s there, just mark it and use the button „remove from list“
